EQuIS®

Data Connector for Power BI

REST API

Unleash the Power of EQuIS Data

Directly and easily access EQuIS data quickly and securely in Microsoft Power BI Desktop via the EQuIS REST API.

View analytics in advanced ways in real time. Share EQuIS information across organizations easily and efficiently with Power BI collaboration tools.

Available via the REST API License.

User Authentication

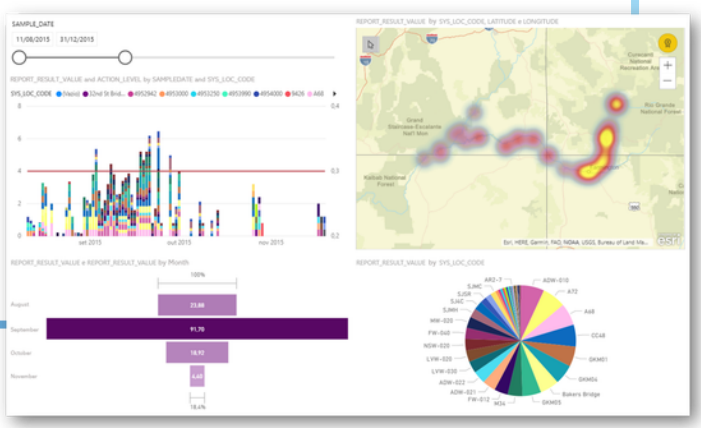

Users assigned the REST API role can access an EQuIS Enterprise site in Power BI via their EQuIS username and password, an API token, or Microsoft Entra ID account.

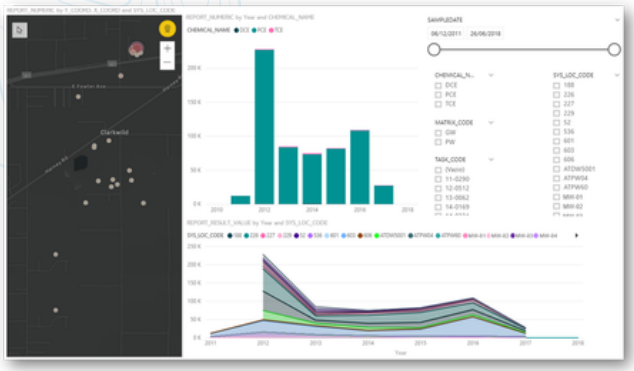

API Tokens are generated in the User Profile Editor in EQuIS Enterprise.

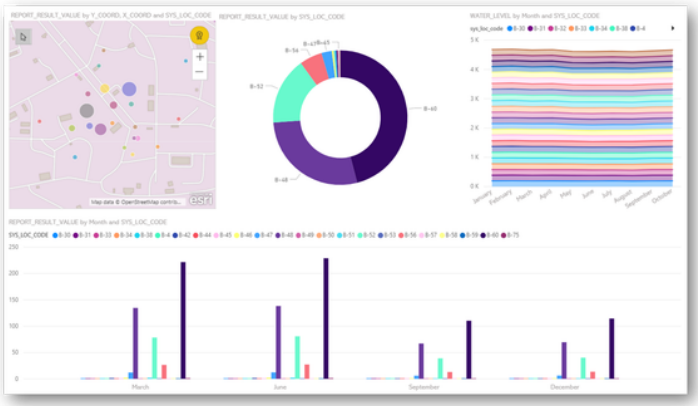

Features

EQuIS and Microsoft deliver a powerful, secure environmental data management platform. Supported EQuIS data sources include:

- EQuIS Facilities (must have user permissions)
- Locations for EQuIS Facilities
- EQuIS Reports
